4 YEARS OF EXPERIENCE

React / TypeScript Developer – Freelance [FOOD] | 9 months (2024–present)
Development of a back-office to manage a restaurant's menu:
- Built an interface to display menu items
- Acted as technical lead during client requirement meetings
- Debugged issues using React ecosystem tools (React Dev Tools)
- Applied Agile/Scrum methodologies
- Managed version control with Git, Git Graph, and GitHub Flow

Stack : React, Typescript, Styled-component, Context, NodeJS

React / TypeScript Developer - SITES [BTP] | 2 years 9 month (2022-2024)
Development of an inspection report creation application:
- Built features for collecting on-site information (photos, measurements)
- Migrated the codebase to TypeScript in collaboration with the Lead Developer
- Implemented best practices (clean code, reusability, scalability)
- Proposed new features and performed maintenance with bug fixing
- Estimated technical effort for tickets (story points)
- Followed Agile SCRUM methodology (sprints)
- Collaborated with design, backend, business, and engineering teams
- Set up unit and end-to-end tests in collaboration with the QA tester
- Deployed applications to PREPROD and PROD environments
- Mentored junior developer (PR reviews)
- Presented end-of-sprint demos to directors and operational teams

Stack : React, Typescript, Styled-component, Context, Jenkins

JavaScript Web Developer – Freelance | 6 months (2021-2022)
Created multiple static websites for various clients:
- Developed a tag management interface | HELLOTAG (SalesTech)
- Built a website for a concierge service | LODG'EXPRESS (TravelTech)
- Built an admin dashboard | JOGA (FitTech)

Stack : HTML, CSS, Javascript, Sass, Bootstrap
